

MOHAMED SABER

PERSONAL DATA :-

- NAME : **MOHAMED SABER SHAHAT**
- DATE OF BIRTH : 17 JAN 1982
- MARITAL STATUS : Married, Children: 2 (sons)
- NATIONALITY : EGYPTIAN
- ADDRESS : EGYPT- ISMAILI
- TELEPHONE No. : MOBILE: +2010-63915351
- E-MAIL : saber133@hotmail.com

EDUCATION:-

- B.Sc. Electrical Engineering (Communication & Electronic) Department, Faculty of engineer Zagazig University.
- And have Membership of the Egyptian Syndicate of Engineers.

CAREER SYNOPSIS:-

- +11years experience in Electro-Mechanical engineer in the field of Renewable power generation especially in wind turbine and solar systems.
- Work as Electro Mechanical manager of maintenance, construction, commissioning tests of the entire project to grid, the maintenance, and operation and troubleshooting.
- Held the positions of maintenance site engineer until the assistant project manager until the project manager.

ACADEMIC STUDIES:-

- Preparing for a Master's degree in ENVIRONMENTAL ENGINEERING at HELWAN UNIV. The point of research:
"Environmental & economic impact of lighting highways by stand-alone Photovoltaic solar stations"

QUALIFICATINS:-

- Certificates in dealing with all forms with all types of wind turbines.
 - Certificates in health and safety and first aid.
 - Certificates in dealing with medium voltages 22/11/33 kV.
 - Certificates in dealing with low voltages and control systems.
 - Certificates in dealing with hydraulic systems.
 - Expertise in management science and organization of work.
-

MOHAMED SABER

SUMMARY OF EXPERIENCE 12 (Years +)

WORK HISTORY:

From 1-4-2012 Present:-

Ministry of Electricity & Renewable Energy- New & Renewable Energy Authority (NREA)

Job Title: PROJECT MANAGER IN ZAFARANA AND JABAL EL-ZYET WIND FARMS PROJECTS

Job Description: Worked AS PROJECT MANAGER of operation & maintenance and troubleshooting, construction, commissioning tests of the entire project to grid.
Performs preventative maintenance, calibration, troubleshooting and shutdown maintenance activities on instrumentation and control systems installed in the pipeline network according to an established programmed. Diagnose faults and carries out repairs and coordinates activities with other disciplines. Adheres to all required safety procedures
